

Group Payment Option (GPO) vs. Self-Insurance Programs

Worth Ave. Group offers a convenient way to protect valuable student technology.

Worth Ave. Group understands the need to provide comprehensive coverage to protect devices used within your school. Choosing the most convenient and effective option suitable for your students' families can be challenging. To help make this important decision, we have an outline below comparing two popular voluntary device protection programs. Schools can provide students with valuable coverage for laptops, Chromebooks, tablets and more without the stress of traditional group insurance programs.

		
 Collecting Money	Via website shopping cart (credit card, PayPal or e-check)	District collects and manages parent payments
 Managing Parts	Takes care of all your needs	Staff must order, stock and manage parts locker
 Staff Involvement	Sends all devices to a repair facility with qualified technicians	Must have dedicated staff to repair devices
 Claims Process	Easy online filing	Create and maintain self-process
 Risk of Program	Assumes all risks with \$0 deductibles and unlimited claims	What happens when the pool of funds run out?

Advantages of Group Payment Option (GPO)

- ▶ Landing page customized with school name/logo and hosted by us
- ▶ School funds are not needed to provide coverage. Families can opt-in to purchase low-cost device protection online from us
- ▶ Schools are the policyholders and have full management of claims
- ▶ Discounted group rates with custom policy coverage
- ▶ Custom applications and enrollment end dates
- ▶ Purchase options for multiple devices on the same landing page
